Chair,
Agriculture and Environment Committee,
Parliament House,
Brisbane Qld 4000

We are pleased to see that our government is proposing to return to the good thing that were removed /changed by the previous gavernment.

We are positive at the reinstatement of the sole object of the act (the conservation of nature) and the reinstatement of three abolished classes of protected area – national park (scientific), conservation park, and resources reserve.

We would also want other classes of protected area that were abolished should also be reinstated – namely Wilderness Area, World Heritage Management Area, International Agreement Area, and Coordinated Conservation Area. Regardless of the extent to which these protected areas had been used in the past, they all have a part to play in maintaining a range of protected areas that are in step with the global categories established by the International Union for the Conservation of Nature (IUCN).

We are sure that others with better skills and knowledge will argue for more and better changes to the tabled bill, for without a good working environment we are so lost. Please make the final document as good as it should be.

Pam and Peter

Save the Earth. it's the only planet with chocolate!
