Subject: State ALP does not give a [REDACTED] about QLD Racing

My name is Michael Bliss, my wife & I are hobby breeders, I work a 38hr week and do extra overtime working at a fertilizer factory to support my passion, & my wife works at Woolworths , so don't think this is just the sport of kings. I and my wife are not in favor of this bill as it will have a devastating effect on the racing & breeding Industry and everyone associated with with this great Industry. Why is it that every time the labor party comes into office in this great state they bring the hatchet to the three racing codes , why can't you be more like the NSW & Victoria governments and embrace the racing codes. We are just ordinary people trying to survive in this Industry, we race our horses with friends and you can be assured that when the next State election comes around we will be spreading the word that the Queensland labor party just does not give a Damn about racing in this State !
