Subject: The Queensland Racing Integrity Commission Bill

As participants in the harness racing industry from owner, trainer, breeder and sponsor, we do not support the Bill being passed as it will have devastating effects on QLD racing stakeholders and related business. Over 30 000 people rely on this industry for a living, this industry could be a thriving resource for QLD, you just need to look at every other state in Australia and how well they run racing. With the current state of Queensland's economy does this government really want to put another 30 000 people out of work and on the dole line, or do they want to rebuild this industry to its glory days and show the rest of Australia how well Queensland Racing across all three codes can run. We do not support this Bill, we do not support the destruction of this industry, we do not support the destruction of so many Queensland families.

Please do not pass this Bill.

Kind Regards

Angela and Ian Gurney
