Subject: CLEAN UP THEIR MESS!
Date: Tuesday, 29 March 2016 1:41:26 PM

Dear Sir

I strongly object to these greedy mining companies who come in, totally damage our environment , damage our precious underground water and are not held accountable .

They can declare bankruptcy and walk away leaving a total mess & a shocking legacy of damage and destruction .

Our underground water in this country is more precious than gold, and need I say, that if we lose our precious water , this country is doomed.

We all rely on our bores, our rivers, our artesian basin and once destroyed or damaged by this coal seam gas/mining it will never recover.

Have you considered the real consequences of allowing this to continue ?

Huge areas of Queensland will simply become uninhabitable , unviable and without good quality water for livestock ,not even viable for our beef industry.

These Companies have no interest in the future of this land & therefore should not be allowed to continue.

Please help us to secure our future here for generations to come ,not just for today .

Regards Norma O'Hara Murphy
