Re: Submission in support of the Environmental Protection (Chain of Responsibility) Amendment Bill 2016

Dear People,

Having only received news of the submissions being closed today I am forced to write a brief submission in support of this Bill.

As is spelled out in the Bill and newspaper accounts of all the unfinished remedial work left behind by various mining operators, this Bill is a first step in making sure the people responsible will be held accountable to finish their repairs.

It is vitally important that this Bill get bi-partisan support as it is clearly in the public interest to make these new rules effective as soon as possible.

Respectfully,

Jonathan Peter
