Dear Whoever,

How damn shortsighted do you have to be, or do you need to be BLIND to see the suffering that puppy farms inflict on there 'product' (aka the puppies) before you do anything? Yes people have a right to run a business, but not at the cost of there products welfare. If it was a human chain this would be stopped, and animals are no different and require our protection. Well those of us who are not politicians but seem to be able to see very clearly the pain and suffering that is caused daily all in the name of 'money', know how cruel it is and that it needs to be stopped. However it is clearly are prerequisite for politicians to have no empathy, compassion or due care for animal welfare...lets rip out your soul so you can be a politician, eh!!

So just on the off chance you do have a soul that does care, do something about this and STOP these disgusting, vile practices from occurring, because WE the people, voted you in, and you can soon be voted out!!

Here is hoping!!
