Subject: Vegetation Management (Reinstatement) and Other Legislation Amendment Bill 2016
Date: Friday, 1 April 2016 2:08:39 PM

Dear Sirs/Madams,

I am writing to support the Vegetation Management (Reinstatement) and Other Legislation Amendment Bill 2016 which has been referred to the Agriculture and Environment Parliamentary Committee for an Inquiry. Land clearing creates more carbon dioxide which means higher temperatures and climate change. It destroys koala and other native animal habitat. Many of these animals are already endangered. It causes more runoff on our Great Barrier Reef which is already suffering a massive bleaching event. Please give this legislation the green light so that these disasters may be averted. Time is running out for us re climate change. This unrestricted clearing might just be the 'last straw' which sets in motion a speed of change which we may not be able to rein in. We have to all stop fiddling while Rome burns.

Thanking you,
Bernadette Duffy
