Attn: Land clearing submission

Dear Sir,

- 1. Land clearing destroys sequestered carbon storage and active carbon sinks.*
- 2. Stricter controls stops excuses and closes loopholes*
- 3. Clearing aggravates runoff problems for creeks and reefs*
- 4. Large areas already bare and unused should be utilised first*
- 5. Bare land raises temperatures and reduces rain, worsens flooding and salinisation*
- 12. Clearing discourages animals*

*Yours faithfully
Edwin ~~Peter~~ Lecons*
