

To whom it may concern ,

I am writing to you as a concerned citizen in regard to the
“ Vegetation Management (Reinstatement) and Other Legislation
Amendment Bill 2016 “.

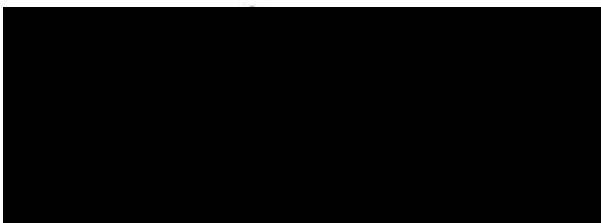

I care about land clearing for a variety of reasons. Some of those reasons include impacts from tree clearing on the Great Barrier Reef from Great Barrier Reef catchments and loss of habitats and impacts on iconic threatened species such as the glossy black cockatoo.

I support this bill and recommend that you pass it because:

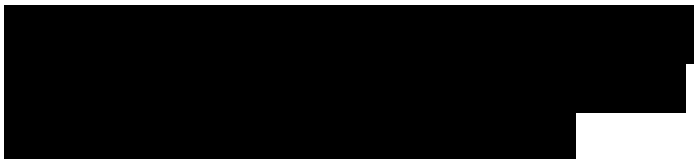

1. Removes the ability to get a permit clear for so-called High Value Agriculture, and thus stop large-scale clearing of remnant woodlands.
2. I live on the boarder ranges and have helped restore Gondwana rainforest and I look forward to helping restore protections on freehold land.
3. Restores protections for trees next to riverbanks (‘riparian areas’) and extending provisions from some to all Great Barrier Reef catchments.

Thankyou for your good work in protecting our natural environment on which we are all connected and need for survival.

My Best Wishes

Lizz Hills
