Subject: Qld Land Clearing Reform Bill

Categories: Added to corro

Dear Sir,

I feel very strongly about the need for this bill to be passed.

There are a few points that need addressing on the original bill and these are addressed in the reform bill.

Once our precious trees and environment is cleared - theres no bringing it - or the species that use it for their habitat and food sources etc etc back.

Please protect our environment for the future and to address climate change as well.

Sincerely

Rochelle Wood
