Subject: Vegetation management (reinstatement) and other amendment legislation bill 2016
Date: Wednesday, 13 April 2016 7:35:20 PM

To Research Director
Agriculture and Environment Committee

I am in favour of the above mentioned bill because I care about land clearing primarily because it destroys the homes of native animals.

I am in support of the bill because

- it will stop large scale clearing of remnant woodlands
- it will restore protections for high value regrowth on freehold and Aboriginal land
- it will restore protections for riparian areas
- it will hold landholders responsible for clearing that takes place on their property.

Yours Sincerely

Rachael
