Subject: submission on land clearing
Date: Sunday, 3 April 2016 6:06:47 AM

Dear Parliament,

I believe that forests should never be clearcut. This kills many living beings and releases enormous amounts of CO₂, accelerating climate change. In case of Queensland forests, it will endanger koalas and other animals already at risk of extinction. Even Great Barrier Reef which Australia has committed to protect will be threatened. New bill would help reduce those effects of deforestation with protections for some trees and parts of land.

Thank you for reading and kind regards,

Dita Škalic
