VEGETATION MANAGEMENT SUBMISSION

Reduces the ability to value add, and prepare for drought by not being able to grow fodder crops etc

I find addhorent the fact that it is the land holders responsibilty to prove his innocence. Not the other way around, that you are innocent untill proven guilty.

The thought of any legislation being made retrospective is also totally wrong, surely if any act is legal when committed, it should remain so untill the law is changed .

And finally the vegetation management act. at present is a good mix between development and conservation, and should not be tampered with for obbbiose political reasons

Yours Sincerly
Don Hick .
