To Whom It May Concern

I am writing on behalf of my sister and myself about the new proposed Vegetation maps of our property at [REDACTED]

Having reviewed the maps we find the majority of our land is proposed Category C. As the whole paddock is the same vegetation all over and the same as our Neighbours, we would like to know why we have only three small patches Remnant Vegetation, and the rest is Category C.

We have always maintained the property and it has never been overly cleared. If the trees are left to thicken with regrowth it will be unprofitable as grazing land. We all know grass does not grow under massed trees.

We would also like to know what "Containing of Concern regional ecosystems" means.

We are writing this letter to object strongly to the proposed Vegetation maps. I pray commonsense prevails and the Bill is opposed.

Yours faithfully

R. L. Nuhn

half owner with L. L. Grech.
