

KERRY QLD 4285

21st April 2016

Dear Sir/Madam,

It has been brought to my attention that some areas on our property being [REDACTED] Parish of Ward is proposed for protection area, this is not on as we exempt our property from this proposal.

If the state Government wants control over our land than I suggest you purchase the whole property from us as we would gladly move back down south like everyone else is doing.

These protection areas severely effects the value and usage of our land.

We manage our property with a strong concern for the environment, and have planted out many trees, both native and non native.

On one section of our property we intend to plant out with Koala food trees as there is a small colony on the adjoining bushland.

We have undertaken erosion control that has been successful.

Our total plan for the property is to have most of it covered with vegetation.

We need to control the vegetation on our land in order to be able to trim or fall trees where necessary and plant more suitable vegetation in some areas.

We Do NOT give this control to the state or any other governing body, however, we welcome any one to call us on [REDACTED] and make an appointment and we would gladly show government authorities our Hands on environmental plan for this property.

Yours Faithfully
[REDACTED]

GOD BLESS THE QUEEN
