Supporting vegetation protection law

The broad-scale clearing of great swathes of bushland continues. All of us and all animals need the bush for clear air, clean water, to stop erosion, to reduce greenhouse gas emissions and to maintain environmental beauty. I would like high conservation value vegetation and river edges protected and reinstated to 2012 levels to protect our Great Barrier Reef from runoff, to reduce the threat of greenhouse gas global warming, to protect our wildlife and flora, to stop land degradation, to maintain essential eco-systems and retain our beautiful and unique bushland. All the never-ending efforts of bush-carers and Landcare groups are undermined under the current situation.

Thanks and best regards

Karen Moores
