Submission

I want protection of high conservation value vegetation and river edges to return to what it was in 2012.

- This will protect our Great Barrier Reef from runoff and thus:
- Reduce greenhouse gas caused global warming threatening us all;
- Protect our wildlife and flora;
- Stop land degradation;
- Maintain essential eco-systems;
- Retain our beautiful and unique bushland.

If this protection is not forthcoming all the efforts of our Bushcarers and Landcare groups will continue to be undermined as is with the current situation and an environmental disaster will result.
