Dear Sir/Madam,

The Vegetation Management Reinstatement needs to be supported for the sake of our Environment for the protection of Wildlife and human health. Release of tonnes of CO<sub>2</sub> from clearing impacts on climate change. We need trees to be able to breathe. If large scale clearing of trees continues we will not have a healthy Environment which in turn leads to an unhealthy economy or no economy to worry about. Vital habitat and Wildlife is being destroyed at an alarming rate. Trees need protecting to support our riverbanks. Landholders will not be able to use the excuse their illegal land clearing on their property was a mistake.

Sincerely,  
Rhonda Green.

Coffs Harbour NSW 2450.
