Dear Research Director,

I represent a group concerned with urban/rural balance in Ireland and we have been following the rampant destruction of important wildlife habitat in Queensland.

Current practices are clearly not sustainable long term as our populations continue to grow and nobody has define a 'finish line' for human expansion into wildlife habitat. Please prioritise our irreplaceable wildlife, end suffering of animals and protect marine and woodland areas.

I wait in hope for a positive outcome.

Kind regards,

Jarlath Reidy
