Subject: The Vegetation Management (Reinstatement) and Other Legislation Amendment Bill 2016
Date: Sunday, 24 April 2016 8:13:34 PM

I am passionate about environmental issues, in particular the importance of native flora and fauna. It's health is the future of our planet. By destroying trees and vegetation, endangered animals, including the iconic and endangered koala, and the Great Barrier Reef, risk extinction. Climate change has already produced record breaking temperatures this summer and the lack of rain across the continent has been devastating for many areas. I support the Vegetaion Management Bill and its passing because it prevents large-scale clearing of remnant woodlands, restores protection for regrowing woodlands and trees in riparian areas and will help deter panic wholesale clearing.

Thank you
