Subject: I support the Vegetation Management (Reinstatement) and Other Legislation Amendment Bill 2016
Date: Sunday, 24 April 2016 11:35:29 AM

To the Research Director,

It is my will as an Australian citizen that this bill gets approval. I would like to express my strong support for this bill.

Clearing of forests is among the most harmful activities that can effect the human race and all life on this planet. Since prehistoric times the oxygen levels on the planet have dropped by over a third and the decline in oxygen levels in developed cities can be up to 50%. Everyone knows tree's produce oxygen by breaking down CO2 into carbon and oxygen. 10,000 years ago the forests covered 50% more of the planet than they do today, therefore the oxygen output from these forests have dropped ~50% with the CO2 output increasing.

If the human race continues clearing forests at any rate we are signing our future away to a slow suffocation. I hope you will not be complicit with the destruction of humanity. Support this bill.
