---

I have vaccinated my horse since it all started (only because I was made too at adjustment property) the last to years of his shots he is not him self I can't ride for 2-3 weeks till he picks up again the swelling is huge on his neck & he can't move freely, this is so stressful for me as this horse has never had a sick day before these shots, I get such anxiety about it all as I'm doing it to him (not by choice) it is such a concern he is over vaccinated & the next I will kill him or he keep getting sicker. This horse is everything to me he is my best friend I really wish we were not made to get it when the side effects of over vaccinated are real!!!! I see negative reactions in all my friends horses from laminitis to feeling so sick they cannot be ridden for months, rashes, it sucks & it's not fair on us horse owners at all. Regards ginny & major
