Good Afternoon,

Please find attached my details.

I work full time at Manly Road Veterinary Hospital.

I also have the good fortune to live on site.

My role here is Accounts Manager.

Firstly, I met a young woman, Natalie, who contracted the Hendra Virus and who is still unwell.

Secondly, I have a young daughter myself and I would do whatever possible to ensure her well being.

Thirdly, I do not wish to contract the virus, get sick or die.

Lastly, We vaccinate our children, it's mandatory, I believe this should also be.

I'm very proud of Dr Christine Kidd and Dr Pauline Gaven for making such a stand against this debilitating virus, that can be stopped by vaccination. I personally believe it should be mandatory. I enjoy spending time with horses, so let's make this Hendra Virus Vaccination a policy of safety first, wellness always. People and Horses.

Yours Sincerely
Helen M Stokes
