

The Agriculture & Environment Committee
Hendra Vaccine Inquiry
C/- Mr Rob Hansen
Parliament House
Brisbane Qld 4001

Dear Mr Hansen,

I have been working with horses for many years.

I have some in my home environment as well, that have been vaccinated without reaction.

I work as a full time Senior experienced equine nurse.

I believe that this should be mandatory.

The safety of horses and people alike is at stake and it's very important to take the safety issues seriously.

There has been death and serious illness.

I am surprised that this is not simply "do the vaccine".

I strongly support the making of the Hendra Vaccine Mandatory.

Yours Sincerely
