Queensland Parliament Hendra Vaccine Inquiry

As an owner and rider of performance horses in Queensland, I have had all of my horses vaccinated for the Hendra Virus without any reaction to the vaccine. Furthermore, we require all horse on our agistment property to also be vaccinated. In these circles of pleasure riders and eventers alike, I have heard of no one's horses having a reaction to the vaccine.

I believe the vaccine is a sensible and necessary step to take for the protection of horses and people and to ensure there are no more fatalities to this virus.

Sincerely,

Daisy-May Denny
