Please accept this submission in support of the Hendra vaccine;

I support the use of Hendra Vaccination in horses and feel safe in my workplace (vet hospital) knowing that all animals and staff are protected from Hendra Virus. In my experience I have never heard of any conclusive negative effects of the Hendra vaccination from colleagues, friends or family who have a horse who has had the Hendra Vaccination. I agree that Hendra Virus vaccination should be compulsory for all eligible horses to protect the wider community.
