

Kylie Thurlow

C/of Manly Road Veterinary Hospital

Manly West, QLD 4119

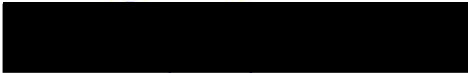

To whom this may concern,

8th April 2016

I support the Hendra vaccination program; I believe the vaccination to be effective and support the proactive use of the vaccination program. As a vet working within the equine sector I feel that y health is extremely important and any program available that can put protection in place for myself, my colleagues, my clients and their animals.

As a horse owner myself I feel much safer having my horses protected and anybody associated with them protected. I have heard of side effects such as a sore neck musculature but have not experienced this myself. I feel a relatively small amount of transient pain is for preferable to permanent death.
