

MANLY ROAD VETERINARY HOSPITAL

"24 Hour Patient Care"

Manly West Qld 4179

Submission No. 73

11/04/16

To Queensland Parliament Hendra Vaccine Inquiry

I support that all horses should be vaccinated against Hendra virus. I am a small animal vet nurse and work in a practise that also hospitalises horses and I feel very safe knowing that our practice will not admit any patient that is not Hendra vaccinated.

I have not heard of any major side effects from the vaccine, and because Hendra kills people I think it should be compulsory to vaccinate all horses for the safety of people and horses.

Thank you

Bridget Williams
