Dear Mr. Hansen,

Re: Support for Hendra Vaccination of Horses

RECEIVED
15 APR 2016
AEC

I am a small animal veterinarian. I came across many horses last year that were Hendra vaccinated. I fully support Hendra vaccination of horses, and have not seen and heard of any cases with major side effects post-vaccination. I strongly believe that the vaccine is effective and I have colleagues that had close contact with horses displaying possible signs of Hendra virus, and remained safe after. I also feel much safer working with horses that are vaccinated. I think that this vaccination should be made compulsory.

Best regards,

Dr. Stephanie Seit (BVSc)
