To Whom It May Concern

My name is Marina Samuels

I live in [REDACTED]

I have 2 mares that have had the HeV vaccination since the vaccine became available. I have NOT had one reaction, to the vaccine and it would devastate me, if the vaccine was taken off the market, as I live in a "hot zone"

WHS and their procedures have made it impossible for Veterinarians to do their job, why is it a Vets responsibility to make sure that "owners" follow procedure? Then if the "owner" fails to follow procedure the vet is held accountable? How is this fair? Or just?

I have seen my own veterinarian's name be tarnished on social media, when she has tried to explain the situation...This disturbs me.

And the outrageous lies that are being told of collusion, profiteering etc of the veterinarian profession.

In summary, I am absolutely satisfied that there is nothing wrong with the vaccine

Regards
