The Agriculture and Environment Committee Hendra Vaccination Enquiry
c/- Mr Rob Hansden
Parliament House
Brisbane Qld 4000

Dear Mr Hansen,

I am a horse owner/breeder for the past 30 years. I also spend the breeding season transporting mares and foals from stud to stud in Queensland and New South Wales.

All 11 of my horses are Hendra vaccinated for the safety of my horses, other peoples' horses, vets, farriers, feed merchants, family, friends and all visitors to the property and community surrounding my property and of course, my own personal safety.

I have horses ranging in age from 6 years to 30 years and ALL have been vaccinated since they were available to the general public. I have not had any recognized adverse reactions to this procedure or the drugs used. This is done at great personal expense to me, however, it is in the best interests of everyone in the horse industry to keep the insidious illness (and death sentence) from striking our equine industry down.

I trust a sensible decision will be made.

Yours sincerely

Wendy Jones
