**Hendra Vaccine Inquiry**

I am in full support of the use of the Hendra Vaccination in horses to protect them and also the people who regularly handle them from this potentially fatal disease. As a practicing Veterinarian I believe in the use of vaccines as a preventative measure and wish to see the Hendra vaccine become mandatory in at risk areas. I work within a Veterinarian Hospital where only vaccinated horses are seen to and therefore feel safe that my colleagues are protected from exposure from this disease.
