Subject: Queensland's water laws need strengthening
Date: Thursday, 6 October 2016 2:39:14 PM

To the Agriculture and Environment Parliamentary Committee,

If Adani is able to get free water whilst our farmers have to struggle, this is an appalling situation!

Please be assured, Queensland state government that you will be judged very severely if this is allowed to happen - Adani should not even be there in the first place!

I am sure our local member Peter Wellington would agree that the farmers are far more important than Adani - who probably won't pay their fair share of tax - like so many other conglomerates in this country. People are so fed up with this unfairness!
