Subject: Submission: Environmental Protection{underground water management} and other
Legislation Amendment Bill

Donald Ballon
[REDACTED]

Member of the agriculture & Environment Committee

I would like to make a formal objection submission to the recent bill tabled in relation to groundwater legislation

I am a local farmer and one of New Acland Coal Mines Closest neighbours and have lived in this community all my life and have worked at the mine for 13 years this in decision about this project has gone on far to long and anything that has not happened in the life of the mine so far or has not been addressed in the 7 month land court battle I think enough is enough and a decision needs to be made .This mine really needs to go ahead for the good of all the community and welfare of all employees and their families. I urge you to let this mine continue without any more delays or protests from those that just need to protest about something.

Regards,
Don Bollon
