To the Agriculture and Environment Parliamentary Committee,

i cant buy vegetables that arent poisoned x monsanto
we cant stop u employing the tpp, which will cost MORE jobs.
u wont stop poisoning our atmosphere & land with contrails
we cant stop u reducing health, education & aged care, every budget,
we cant stop u selling our national assets [jobs]
we cant stop the corruption that is the 457 visa.
you wont let us join the china o.b.o.r. & make good commerce.
we cant stop u contributing to global warming.
& we cant get our voice heard, because the mass media [murdoch]
tells the people only what they want us to know

this ride u are on with washington, will collapse! already there are class actions against
major players in washington. crimes against the universe & humanity. this will eventually
filter down to smaller western countries, & they will prove your complicity.

please dont let the major corporations corrupt our water systems for a mere 30 pieces of
silver! your children & grand children WILL hear of your weakness to defend your
constituents.

we working ants rely on you all, to keep our country healthy, keep us in jobs.
it isnt too late people. please share our voice! please do what is right for your off spring. i
promise u, the bunker u have been offered to hide in during the coming events, will not
protect u. russia & china will prevail, without firing a shot. the next war will be economic
& america & nato, eu will collapse to the betterment of the worlds people.

melville powels
