Subject: Environmental Protection (Underground Water Management) and Other Legislation Amendment Bill 2016

Categories: submission

Dear Sir/Madam,

I would like to express my concerns regards to the impacts of the introduction of the new legislation that has been passed in regards to the underground water management as per the bill of September 2016. This particular legislation aims mainly to coal mines in Queensland, and also for myself and my family.

I work for New Acland Coal and my family and the local townships rely on this mine for employment.

New Acland has always supported their employees as well as the local communities and if there were any more delays in obtaining approval for Stage 3 this would have significant impact on many people regarding employment and local business viability.

New Hope has always worked responsibly in regards to best practices and the willingness to work with the appropriate authorities in regards to obtaining approval for Stage 3.

Thank you for understanding my concerns.

Regards,

Robyn Herrmann
Administration Assistant
