---

Dear Sir/Madam,

In my case i would like to be able to destroy the flying-foxes which invade my stone-fruit orchard. As they destroy a considerable amount of the ripening fruit as well as severely damaging the trees (breaking-branches).I believe once a few have been disposed of they will stay clear of the orchard,as they are quite intelligent.I shall rest my case for your consideration with the matter, and hope to hear some positive news in the near future.Sincere Regards, myles.
