This is our submission to discussion on the Minerals and Energy (Common Provisions) Bill 2014

We believe this draconian attitude towards the rights of people is yet another attempt by an incompetent member of this anti-people government to turn this state into a languishing member of the third world.

Clauses 429, 420, 418, 245, 423 and 424 are abhorrent and are indicative of the callous disregard the Minister appears to hold the community in. We oppose the Bill in all shape and form

Peace

Anne and Lawrie Martin
