Submitter Comments:

I have serious concerns as to the contents and changes made to the "Queensland Community Safety Bill 2024", specifically the community consultation period being only open until May 16th, which does not allow for an acceptable period of review and analysis of the 100 page document and to form a response if required. I ask for your consideration to extend this community review period so that all members, stakeholders and citizens relevant or to whom these changes will affect, have acceptable or appropriate time to review this new information. I appreciate your action on this matter.
