Dear sir,

As a long time shooter I object to the swift manner in which the Queensland Safety Bill 2024 is being pushed through Parliament, without time for proper Public Consultation and submissions being made. I request they extend the time available for consultation on this Bill, to allow stakeholders and citizens alike proper time to go through it, analyse it, and put together a proper submission, as it affects the Civil Liberties of all citizens not just shooters who already have many laws and obstacles by which to abide.
Ian Simmons
