Subject: Submission to the inquiry into social isolation and loneliness in Queensland

Good Afternoon

If I may could I please explain our situation We have a house in Brisbane and a business near Narrabri in NSW . There has never been a Covid case here ever .

We are repeatedly not able to enter QLD , not able to visit the family members, not able to return home because of why ? No cases ever . It's like being pulled up for a breath test ,testing negative but still being fined because you may someday be over the limit Currently we are trying get some building work done that is particular to a Qld company but they are unwilling to cross the boarder on the Newell Hwy because they not be able to return without being fined or sent to 2 weeks quarantine.

What really is the point ? Business and personal distribution, to what end ?

No cases , so one is not able to spread something that doesn't exist in our area Regards John Duncombe
