Recipient
Public Health and Other Legislation 2022
Parliament House
George Street, Brisbane, Q, 4000

Dear Recipient,

As constituents in the electorate of Callide we would like to submit our objection to the extension of emergency powers regarding the Public Health and Other Legislation (Extension of Expiring Provisions Bill) 2022. We believe it is time that we get on with life amidst Covid and any other transmissible disease or virus that may come our way. We believe in the freedom to work in the industry that we are trained to regardless of vaccination status and the freedom to move about and trade, especially within our own country and further afield. We believe that there should no longer be a ban or gag order on our doctors to recommend and prescribe alternative treatments to Covid. We also believe that all mandates be lifted on our schools, businesses including entertainment venues and government owned establishments. We believe that there should be no impediment on parents and students to attend high school functions or locals and patrons be excluded from local shows. It is evident now that these mandates are ineffective in preventing the spread of Covid therefore all mandates should be lifted.

We implore this committee to take into consideration that people need to get on with their lives and that there needs to be some onus back on individuals to take charge of their own health and risks as we have learnt what care is needed to keep ourselves and others safe. Please put an end to the confusion and the putting on hold of lives and livelihoods and give hope back to the people of Queensland.

Yours sincerely,

Gavin and Cassandra Warmington
