

To whom it may concern,

I am very concerned about the proposed extension of the state of emergency powers proposed by the minister of health. The past 2 years under these powers have already eroded Queenslanders rights and had significant impacts on the economy and mental health of the population. Queensland's Omicron wave resulted in far fewer hospitalisations and deaths than modelled and clearly show that covid restrictions are no longer necessary.

I would like it to be known that as a Queenslanders I do not support this proposed extension of the State of emergency as it is unnecessary and will only act as a weapon to be used against the population to shut down businesses and enforce vaccine mandates.

Kind regards,

Mikala Humphrey
