Submission regarding Public Health and other Legislation
(Extension of Expiring Provisions) Amendment Bill 2022

Submitted by: Gary Woolrich

[REDACTED]

I am making known my strong objection to this Amendment for these reasons ...

The Australian Bureau of Statistics report states that from March 2020 to Feb 2022, of the 273,901 deaths in Australia only a little over 200 people died purely from Corona.

0.9% of the total 2,639 deaths were related to corona. Of these, 92% had co-morbidities.

The average age of those who died was 81 in men and 86 in women.

Reviews from scientists around the world say that, at worst, a person who contracts COVID will suffer flu like symptoms for a week and that's it.

Why would you shut everything down again causing depression and suicide, financial loss, loss of homes, fear, an 'us and them' mentality for a condition the kills 200 out of 273,901 Australians. You are killing our country. I object strongly to this foolish, wasteful, destructive and controlling mandating.

Sincerely,

Gary Woolrich
