

Re: Public Health and Other Legislation (Extension of Expiring Provisions) Amendment Bill 2022

Date: 2 March 2022

To: Whomever it may concern.

I write to you about the proposal to extend the current Emergency Powers through to Oct this year. I am deeply opposed to this proposal. Queenslanders have been through so much in the last 2 years, businesses have gone under, jobs have been lost, mental health & suicide are at an all time high, & families & friendship have been under huge strain.

Now with such a high vaccination rate, why is this even being talked about? Nearly everyone is protected now, so should there another variant, pretty much no-one would catch it anyway because the vaccines are so good. Right now we need to be focusing on SE Qld & recovering from the recent devastating floods. Please can we just get on with our lives without the threat of unnecessary lockdowns, mandates & restrictions hanging over our heads?

Yours sincerely,

Heidi
