

Dear QLD politicians,

My name is Karen Fiala,

[REDACTED]

[REDACTED]

I have lived in the same home for nearly 34 years. I have seen all sorts of things happen in QLD during that time. Good employment (something all political parties purport to encourage) has been scarce and now, with the powers to medicate people against their will (and if they don't they lose their jobs) I have seen such hardship in so many people that your measures have been beyond cruel.

This year we have lost our dentist; doctor; and many other professionals - all because they did not want to be told what 'medication' to take. They did not want to be forced (and it was forced) or lied to about the side effects. I know a lawyer who has heart issues now and he's only young and he's only one person out of the thousands who have been harmed in so many ways by these horrific mandates.

I do NOT agree to government's over reach. You were here to help the people of QLD and instead you have 1. made people give up their careers 2. Forced them to sell their homes (mostly to Southerners who came here and snapped up those homes when people could not afford their mortgages, due to the mandates 3. Stopped QLDers from having normal lives e.g. going to coffee shops etc. Meanwhile you allowed corporations and corporate cafes e.g. McDonalds to operate freely if they were in a food court or drive through.

All of this discriminated against small business - employing QLDers and families trying to make a 'go of it'.

This is cruel and inhumane and I do not want further powers given to the QLD government, or any government, which hurts the people.

Every day I see more and more cries for help from families, single mothers, professional people wanting jobs etc.

You have a duty of care to these people.

You, alone can stop the mandates and do what you were put in to do, make QLDers lives better, happier and thrive.

I hope you will listen to the people.

Regards,

Karen Fiala
