---

I implore you to stop the extension of the emergency bill till 31 October 2022.

Human rights are being taken away and whatever the 'new normal' is does not justify these extreme and unnecessary plans.

It is time to stop the mandates and restrictions of people and live with Covid and all that it brings. Research and surveys are clearly showing that it is detrimental to society, the wellbeing, mental health of us all to halt any further activity regarding this matter.
