Subject: End the emergency powers
Date: Monday, 28 February 2022 8:32:42 PM

Hi there,

My name is Jade Murphy-Stewart and I reside in North Lakes, Queensland.

I ask that the emergency powers are not extended and that they are scrapped permanently. No government souls hold this power. The recently released ABS figures show that there was no emergency and that deaths *with* covid were similar to a small flu season. The use of emergency powers was not justified and only proved why they should never exist in the first place.

Blatant disregard for human rights, the right to breathe, the right to movement, the right to medical care without discrimination. All this been overridden and police were used against the people who pay them to uphold the unjustified emergency orders.

The past two years have been disgraceful and I've never seen such blatant hypocrisy and such an abuse of power in my time as an adult from the state government.

End these powers now!

Jade Murphy-Stewart
