---

My name is Anita Tubaro of [REDACTED]  
[REDACTED]

I am putting in my submission to cease the QLD state of emergency law. It is not necessary and will only cause further financial loss to businesses who have already suffered enough and increase mental health issues. We have had more people commit suicide due to this over the last 2.5yrs. Our lives have been disrupted enough. Also New Zealand, Canada and other countries have stopped the mandate, so there is no reason for us to continue something that is not necessary. This is only causing more harm than good.  
Stop this madness now and get on with our lives.  
This is not just my view. Everyone I know feels the same.
