Subject: I do not agree with the extension of the Emergency Bill
Date: Wednesday, 2 March 2022 2:54:32 PM

To Whom it May Concern,

I do not consent or agree to the extension of ANY Emergency Bill or powers.

I do not consent or agree to the extension or preservation of ANY QR Code Check-ins, or the ongoing and unnecessary segregation of individuals based on their vaccination status.

The mandate by State Governments should never have been introduced.

I do not consent to the ongoing waste of tax payers money being used to police compliance and adherence to ridiculous policy at the cost of small business, and the collapse of the fabric of our society. The division perpetuated by government control, and the restrictions imposed have over the last 2 years have cost and continue to cost lives, livelihoods, the innocence of our children, destruction of the family unit, access to health care, and among many other casualties Hope!

Whilst every loss of life is tragic, many covid deaths have occurred in individuals with serious and life limiting disease processes, and many in people that have exceeded the age of life expectancy. It is also very evident that hospitalisation numbers "of covid patients" are not accurate representations of the disease based on individuals being considered covid cases for having dated positive results, that in many cases may have presented to hospital for completely unrelated issues. The honesty of our government continues to be questionable whilst situations like this repeatedly occur.

We have ostracized and exiled our unvaccinated from society and vilified them in parliaments and across media, with statements like "it is a virus of the unvaccinated" or the virus will hunt down the un-boosted, even suggesting disgraceful hints and tips on how to avoid unvaccinated family christmas day. And yet despite their exclusion cases particularly in areas they weren't welcome exploded.

The government and complicit media have filled our homes, cars, shopping precincts, doctor surgeries, magazines and road sides with emotive, coercive, repetitive government approved propaganda whilst systematically silencing and oppressing data, science and learned specialists with opposing views. The government has failed in its duty to the people of this country for which it was trusted to serve.

I demand nothing less than the return of our rights to travel freely through our great country, to be able to conduct my life, and earn money unhindered or restricted by mandates and without tracking or tracing QR codes or similar, and request your support in ensuring these basic and inalienable rights are not only restored but for ever more protected.

Sincerely,
Rebecca Smith
